## Installation Guide

### Bath Filler Mixer Tap

#### Pre Installation Notes

To maintain the tap's appearance, please ensure it is cleaned regularly using a clean soft damp cloth only. Abrasive cleaners or detergents must not be used as they may cause surface deterioration.

Bathroom products are vulnveratble to household acid damage. Products like hair dye, disinfectants, denture cleaner etc may contain acids that maybe harmful to your product. Contact with these should be avoided.

#### Important Information

**Max Pressure  
5 Bar**

Diagrams are for illustration purposes only. Your tap may superficially differ from this drawing, however the installation guide steps still apply.

## Step One

Flush water through the mains water feed to ensure they are clear of debris and isolate the water feed.

OFF

## Step Two

Carefully assemble new fitting onto sanitary ware. Do not overtighten as this may cause damage to the fitting and the sanitary ware. Remember to install the O ring or washer (where applicable) between the tap body & sanitary ware.

## Step Three

Connect flexi tail(s)/inlet connector(s) to the mains water feed. The hot supply should be connected to the left-hand side when viewing the installation from the front.

## Step Four

Tighten the flexi tail nut to the mains water feed using an adjustable spanner. Do not overtighten.

## Step Five

Place the tap handle in the 'Open' position and turn on the water supply. Allow the tap to run for 90 seconds to clear any debris from inside. Use this time to identify any wet areas or potential leaks.

## Step Six

Turn tap handle to 'Closed' position.
