

This product is IP44 - suitable for installation in zones: **2 & Outside Zones**

All installations must comply with guidelines which are based on a zonal concept. The diagram above illustrates this concept and must be followed to ensure the safe installation of electrical appliances in the bathroom. These regulations apply to domestic installations only. Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations. **HiB recommends that all electrical bathroom products should only be fitted by a suitably qualified, Part P registered electrician.**

Fitting Instruction

1. Position the ceiling light in a suitable location (according to the zonal diagram above (Fig. 1), ensuring that the domestic electrical mains supply is within reach of the electrical entry point of the product.
2. Carefully mark the position of the ceiling light mounting points using a soft pencil. **Please ensure that all marked mounting points accurately match up with the fixing points on the ceiling light.**
3. **Before drilling, ensure there are no hidden cables or pipes behind the mounting points.** Using a suitable drill bit, drill holes in the marked positions to a suitable depth.
4. Insert wall plugs level with the surface of the ceiling. *NB. For plasterboard ceilings, specialist fixings should be purchased, available from any DIY or hardware store.*
5. Line up product with marked fixing points and screw into place.
6. **Ensure the domestic electrical mains supply to which the ceiling light is being connected is turned off.** Connect the domestic mains supply to the terminal box according to the wiring diagram (Fig. 3).
7. Push LED module into four pin connection (Fig. 2). Attach ceiling light shade cover and lock into place.
8. Switch domestic electrical mains supply back on.
