BATHROOMS

Installation Instructions and User Guide

Models covered:

All Freestanding and Fitted Baths

Please keep this booklet for future
Reference.

Installer: when you have read these
instructions please ensure you leave them
with the user.

Contents

When you buy a Heritage product, you can be confident that it not only features a beautiful, distinctive, classic design, but that it has also been made to the very highest quality standards. To ensure that it works to its full potential, it needs to be fitted correctly.

These fitting instructions have been created to give you all of the information you need and, if you need any further help, please do not hesitate to give us a call on **0844 701 8503**.

Safety Notice

Installer Guidelines

Installation

Guarantee

Notes

Safety Note

- Please read these instructions & retain for future use. All products manufactured & supplied by Heritage are safe, provided they are installed correctly, used correctly, and receive regular maintenance in accordance with these instructions.
- **If you are in any doubt about your ability to install this product safely you must employ the services of an experienced qualified plumber.**

Before starting any installation project please consider the following:

- Prior to drilling into walls, check there are no hidden electrical wires or cables or water supply pipes with the aid of an electrical detector.
- If you use power tools do not forget:
 - Wear eye protection.
 - Unplug equipment after use.
- This product must not be modified in any way as this will invalidate the guarantee.
- These fittings need to be installed in accordance with and meet the requirements of the Water Supply (Water Fittings) Regulations 1999 and Scottish Byelaws 2004.

Installer Guidelines

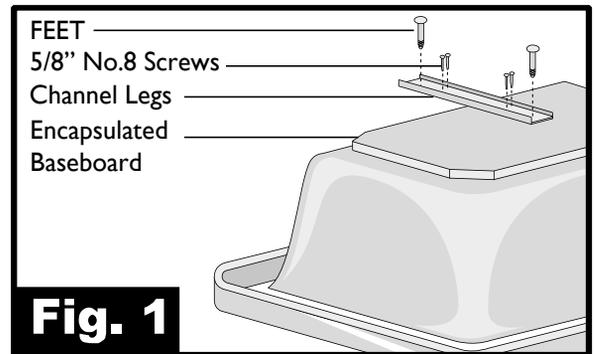

- Ensure the bath is adequately protected should you need to stand in it.
- Do Not allow paint strippers, spirits, dry cleaning agents, cleansers or bleaches to come into contact with the surface.
- If a blowlamp is used when plumbing, the flame must be kept well away from the fixture.
- Use a silicone sealant to ensure a watertight joint between the rim and the wall.
- When making joints to the waste fitting use only the washers provided and an approved sealing compound. **DO NOT** use boss white, linseed oil putty or similar oil based compounds. Avoid excessive force when tightening plastic nuts.
- Please ensure that installation design is such that future serviceability of the product is considered. In the event of a claim under the product warranty terms, removal costs will be restricted to reasonable levels where installation design results in disproportionate costs.
- Failure to observe the installation instructions will nullify your guarantee.

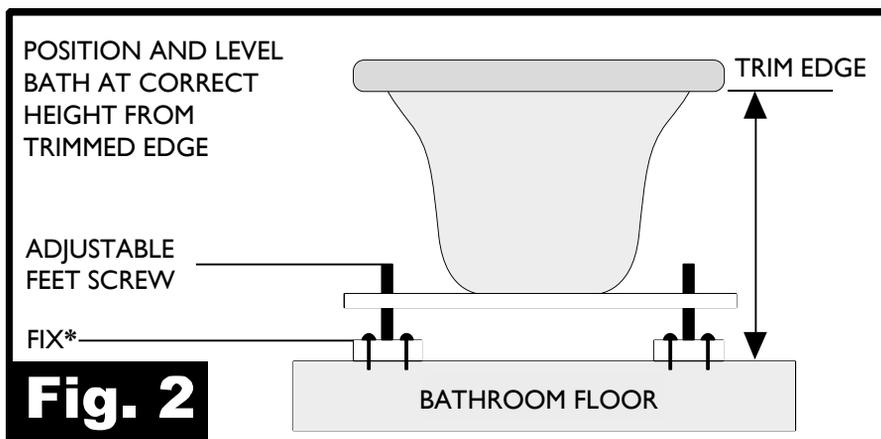

Installation.

Every care has been taken to ensure that your bath arrives in perfect condition. Before installation please remove protective packaging from the bath and inspect. We will not accept responsibility for the installation of faulty or damaged baths. We recommend the bath be recovered for protection during the installation.

1. Place bath legs across the base of the bath approx. 130-150mm from the ends of the encapsulated base board (See Fig.1)
2. Fix in place using the screws provided.
3. Apply one nut on each of the adjustable feet and secure two to each leg with the remaining nuts.
4. Ensure the floor is flat and level
5. Position and level the bath, setting the height according to the panel purchased. (See Fig.2)
6. Using a straight edge / spirit level, check the rim fall by positioning the straight edge / spirit level 45 degrees from outside corner across to the rim of the product. Ensure rims allow for the drainage of water back into the tub from all sides.
7. Drainage – Temporarily fix waste plumbing to the tub and empty 5 litre of water into the tub area. Check product drainage, in the event of water retention, (other than that held by the surface tension), re-check bath level and re-platform test. Once satisfied, proceed with the remainder of the product installation.

NOTE: Freestanding baths must be positioned with a minimum of a 50mm gap between the bath & the wall surface. This is to allow movement of the bath whilst entering and exiting the bath.

* Fixing the bath legs to the floor does not apply to freestanding baths.

Installation Cont (Fitted Bath Only).

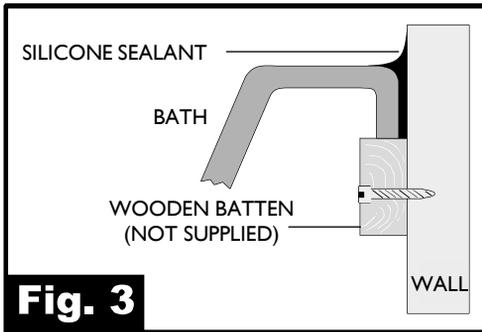

Fig. 3

8. Mark the feet and screw hole position on the floor (see Fig.2)
9. Scribe a line on the wall to the underside of the rim.
10. Remove the bath, and fit a softwood batten to this line to act as additional support to the rim. (See Fig.3)
11. **ADDITIONAL SUPPORT FRAME: NON WALL CONTACT AREA**

On the remaining unsupported edges of the bath Installation we recommend the fabrication and fitment of

additional wooden supports / framework as per illustration. This example involves the use of timber (chipboard) pads adhered to the underside rim which then support vertical timber batons which are fixed in place with the use of L brackets (Fig. 4/5).

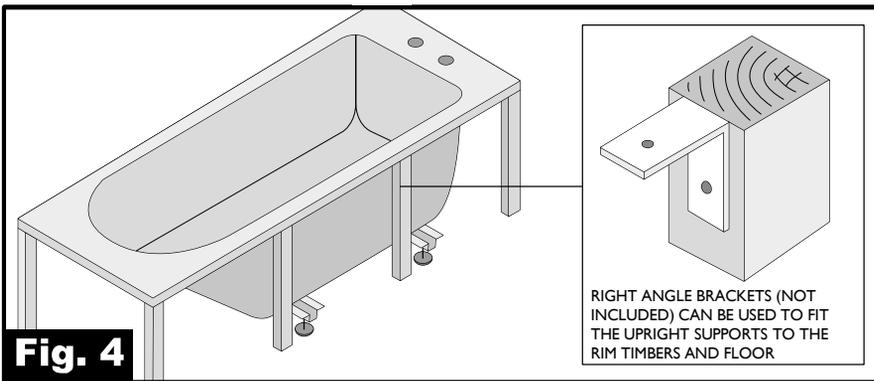

Fig. 4

We would recommend the use of a car body filler type medium to adhere the pads and ensure they are set level. All of these additional materials need to be acquired separately and are not supplied with the product.

12. Apply a liberal amount of silicone sealant to the outer rim of the bath which will be adjacent to the wall. Reposition the bath ensuring that it is pushed firmly back to the wall and that the feet are back in their original position.
13. Fit additional wooden supports/framework along the un-supported front and side rims of the bath as per illustration (Fig.4). Finally fix supporting framework to bath and floor.
14. Leave the bath until the silicone has completely cured, then complete the installation ensuring all fixing are secure.

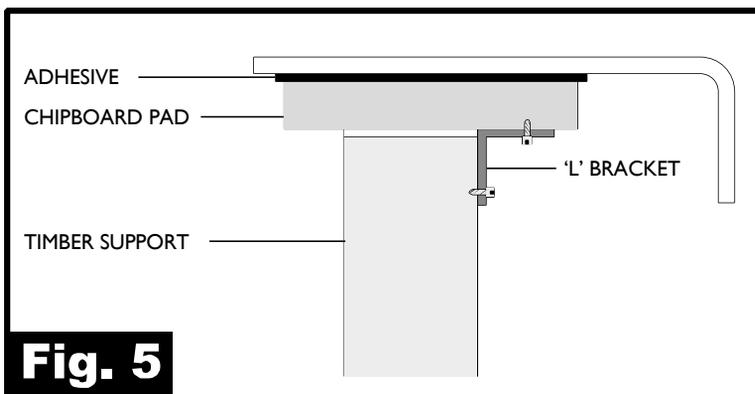

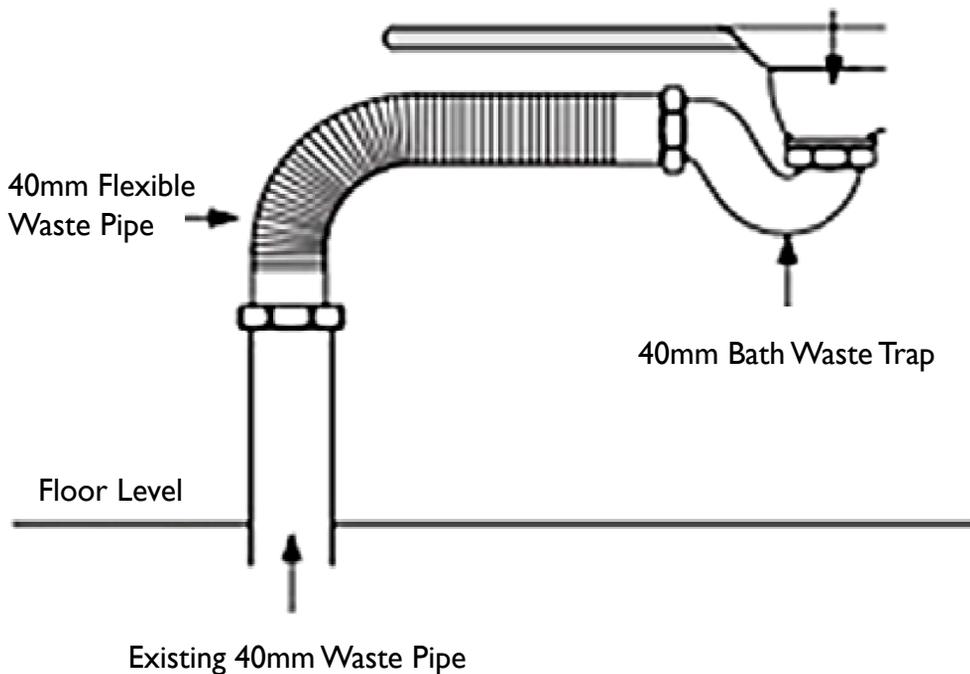

Fig. 5

Installation Cont.

Baths with integral overflow:

1. Connect 40mm bath waste trap to integrated waste and overflow.
2. Connect 40mm flexible waste connector.
3. Place bath above desired position on blocks so that the final waste connection can be made.
4. If you only have waste outlet access above floor level, drill a 70mm diameter hole in the outer skin of the bath for access.
5. Make the final waste connection and check for any leaks.
6. Lower the bath into position and adjust the levelling feet for stability.

Maintenance

Caring for your Bath.

1. It is recommended each time you use the bath to cover the base with cold water before turning on the hot tap.
2. For everyday cleaning we recommend using a damp cloth and warm soapy water.
3. You should never use abrasive cleaners on your bath, they will scratch the surface.
4. If you do scratch the bath use a small amount of T-Cut, this will help restore your bath to a lustre finish.
5. Replace worn washers on dripping taps to prevent surface marking.
6.  **WARNING:** Solvents such as paint stripper and nail varnish will damage your bath.

Register now for additional peace of mind

Register your product with us now and, if you do have any queries after installation, we'll be able to quickly identify the product and give you the best advice. It also means that you won't have to keep your proof of purchase to validate your guarantee. To register, simply go online at www.heritagebathrooms.com/register

Guarantee Terms and Conditions

This guarantee is in addition to your statutory and other legal rights and is subject to the following conditions:

- The product was purchased within the United Kingdom or Republic of Ireland
- The product is used in domestic applications only
- The guarantee applies solely to the original purchaser with proof of purchase
- The installation must allow ready access to all products for the purpose of inspection, maintenance or replacement
- Repair under this guarantee does not extend the original expiry date. The guarantee on any replacement parts or product ends at the original expiry date

Any part found to be defective during the guarantee period will be replaced without charge, providing that the product has been installed in accordance with the instructions given in this guide and used as the manufacturer intended. If the product is no longer available, Heritage will endeavour to provide the nearest equivalent.

Heritage Bathrooms Guarantee Cont.

The guarantee does not cover:

- Damage or defects caused by
 - General wear and tear (including special non-chrome finishes; components such as filters, seals, 'O' rings and washers)
 - Incorrect installation
 - Repair using non-Heritage parts
 - Accidental or wilful misuse
 - Corrosion and the use of inappropriate cleaning products.
 - System debris including the build-up of limescale (which can be controlled through regular servicing and maintenance)
- Compensation for loss of use of the product or consequential loss of any kind.

In the interests of continuous product improvement, Heritage reserves the right to alter product specifications without notice.

Need help?

In the unlikely event that you encounter a problem with your Heritage product, you must, in the first instance, contact the retailer you purchased it from. They will advise as to whether it is due to a manufacturing fault or an installation fault. If the problem is due to a manufacturing fault, they will contact us to arrange a supply of a replacement product as soon as possible. To speak to a Heritage customer service advisor, please contact our technical helpline on **0844 701 8503**.

Notes

Please use this space to add any notes which you or your installer may have regarding the servicing and/or installation of this product.
