

Evo Fluidics Technology Handset Installation Instructions

Important Safety Information

Please read these instructions thoroughly and retain for future reference.

All products manufactured and supplied by Bristan are safe provided they are installed correctly, used correctly and receive regular maintenance in accordance with these instructions.

- Do not use the showerhead if it has been damaged or is blocked.
- This product **must not** be modified in any way as this will invalidate the guarantee.
- Not suitable for use with Electric Showers

Installation

Flow Regulator

Your Bristan handset has been fitted with an 8 litre per minute flow regulator.

If the handset is fitted in conjunction with an instantaneous water heater (combination boiler) the flow regulator must remain fitted.

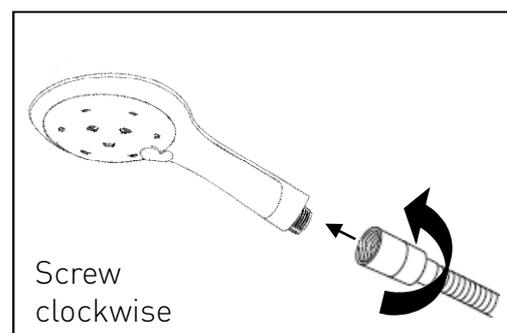

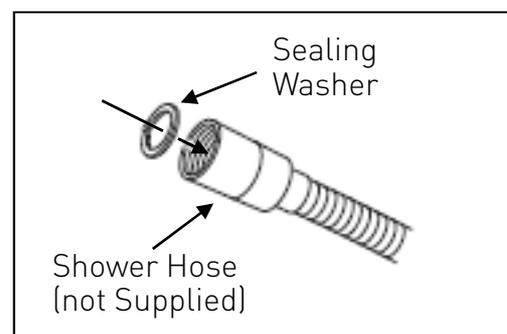

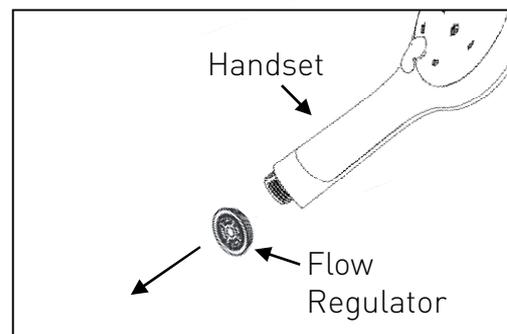

If fitting the handset in conjunction with a low pressure (gravity fed) system where the water pressure is below 1.0 bar the flow regulator will need to be removed.

To remove the flow regulator simply pull it out from the end of the handset using a pair of long nose pliers.

Fitting the handset

Place the appropriate sealing washer into the hose outlet (not supplied).

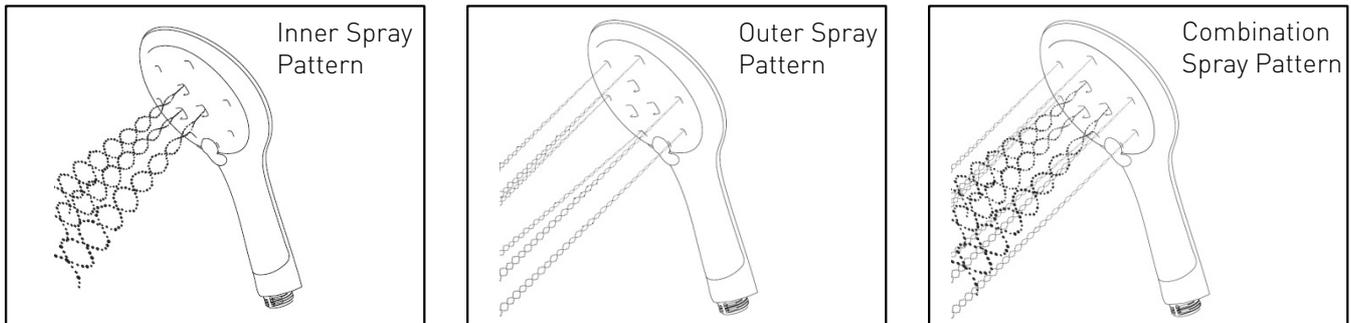

Holding the handset, screw the conical end of the shower hose (not supplied) clockwise onto the thread on the bottom of the handset until tight.

Operation

Adjusting the multi-function showerhead only.

The multi-function showerhead has 3 spray patterns, inner spray, outer spray and a combination of both inner and outer spray patterns. To change the spray pattern simply turn the flow pattern selector lever to the desired position.

Cleaning

Your fitting has a high quality finish and should be treated with care to preserve the visible surfaces. All finishes will wear if not cleaned correctly. The only safe way to clean your product is to wipe with a soft damp cloth. Stains can be removed using washing up liquid. All bathroom cleaning products (powders and liquids) will damage the surface of your fitting, even the non-scratch cleaners.

Note: Never use abrasive detergents or disinfectants or those containing alcohol, hydrochloric acid or phosphoric acid.

If lime scale builds up around the spray holes gently brush over the spray plate before use.

Guarantee

5 year parts only.

The guarantee excludes general wear and tear and damage caused by accident, misuse or neglect, and does not cover the following:

- Damage caused by faulty installation
- Damage caused by lime scale or any other waterborne debris
- Damage caused by inappropriate cleaning products (see cleaning section)
- The product being used for a purpose other than intended
