

LQ347 INSTALLATION DRAFT

INSTALLATION GUIDE:

1. Position the hanging point of the mirror and marking the drilling hole; Ensure the two drilling holes on the same level. Drill the holes by using the drill, then insert the plastic sheath into the holes; Fix the wooden bracket of the mirror with the screws on the wall and then connect the electric line.
2. Hold the mirror with hands and hitch the mirror on the crossbeam of the wooden bracket; Adjust and position the mirror in the middle of the wooden bracket.

Remark:

1. Please do not peel off the label on the bottom. Please use the pull switch only when the switch on/off stops working.
2. When fitting the mirrors, please keep the switch on/off away from any object that will cause refraction.
