Installation Guide

mira
SHOWERS

INTRODUCTION

Thank you for purchasing a quality Kohler product. To enjoy the full potential of your new product, please take time to read this guide thoroughly, having done so, keep it handy for future reference.

The following pages aim to provide comprehensive installation instructions, plus advice on how to care and maintain your product.

We recommend that the unit is installed by a qualified plumber or engineer.

GENERAL INFORMATION

General

1. Read all of these instructions and retain this guide for later use.
2. Pass on this guide in the event of change of ownership of the installation site.
3. Follow all warnings, cautions and instructions contained in this guide.
4. Remove all protective tape from the enclosure before installation.
5. Excessive flow rates may lead to overflowing and leaking.
6. Water Spray may extend beyond the entrance of walk-in enclosures and we recommend tiling of the adjacent area.
7. We recommend a drainage test is carried out to ensure the waste is adequate for the flow delivered
8. Doors that open outwards may drip water onto floor, ensure the floor covering will not be affected by water.
9. Walk ins and divider panels are designed to minimise water escaping outside the enclosure but by their very nature are not fully water tight.

Safety Information

1. Care should be taken when drilling into walls and floors to avoid any hidden pipes or wires.
2. We strongly recommend that all glass panels are moved by a minimum of two people and that any protective packaging along the glass edges is kept in place for as long as possible to prevent damage before installation.
3. During installation we recommend additional help in lifting heavy doors and side panels.
4. Wear protective footwear when lifting panels.
5. Wear safety glasses when drilling.

Before Fitting the Enclosure

1. Ensure the tray is level and walls are vertical and square.
2. Shower fittings should be positioned such that water discharges down the centre line of a bath or across the opening of a shower cubicle door.
3. Ensure water is not directed at the shower door or side panels. This could result in water spraying outside of the enclosure.
4. Ensure the door opening is positioned correctly and is adequate for all users.
5. Ensure there is a complete silicone seal between the tray and finished wall.
6. Ensure the door is undamaged and no parts are missing.

7. Ensure the size of door/panel is suitable for the installation. Tempered safety glass cannot be cut.
8. Ensure nothing can impact the door or glass panels during operation.

When Fitting the Enclosure

1. The wall channels must be installed onto a tiled or waterproof finished flat and even wall surface. Failure to do so will result in an unsatisfactory seal, which may cause property damage.
2. We recommend our enclosures are fitted onto shower trays.
Warning! The use of grout/tile cleaners, scale removers, abrasive scourers, drain unblockers and other powerful detergents may lead to damage of metallic, plated and plastic surfaces, including the tray and shower waste.

Use of the Enclosure

1. High water pressure and flow may lead to excessive splashing causing water to escape outside of the enclosure.
2. In certain circumstances such as cleaning, water sprayed directly at the seals may escape outside of the enclosure.

GUARANTEE

For **domestic installations**, your enclosure has the benefit of our lifetime guarantee which starts from date of purchase.

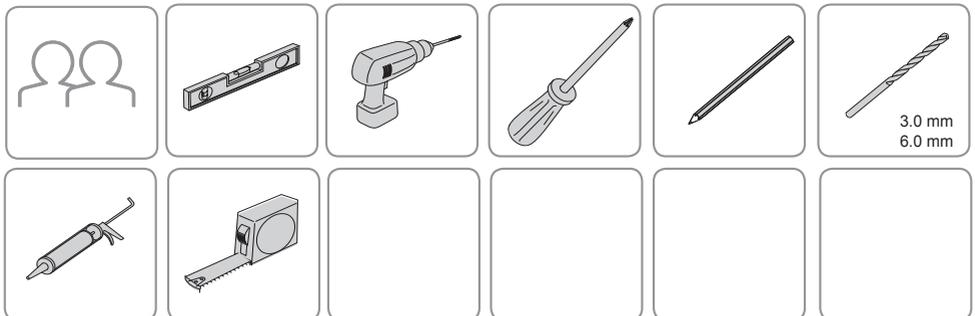

For **non-domestic installations**, we guarantee the product against any defect in materials or workmanship for a period of one year from the date of purchase.

For terms and conditions refer to the back cover of this guide.

RECOMMENDED USAGE

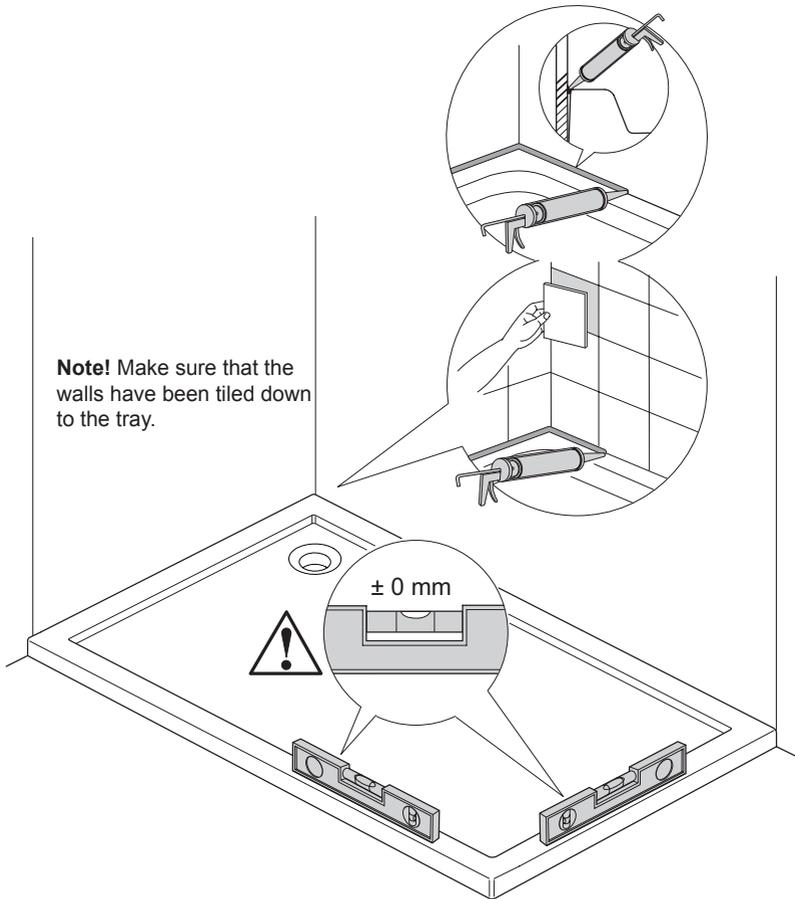

Domestic	✓
Light Commercial	✓
Heavy Commercial	✗
Healthcare	✗

TOOLS REQUIRED

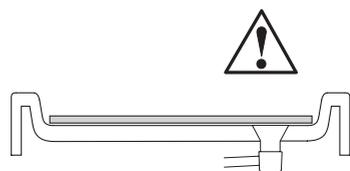

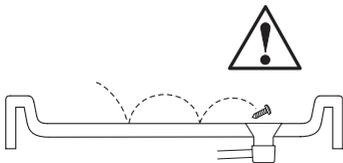

INSTALLATION

1

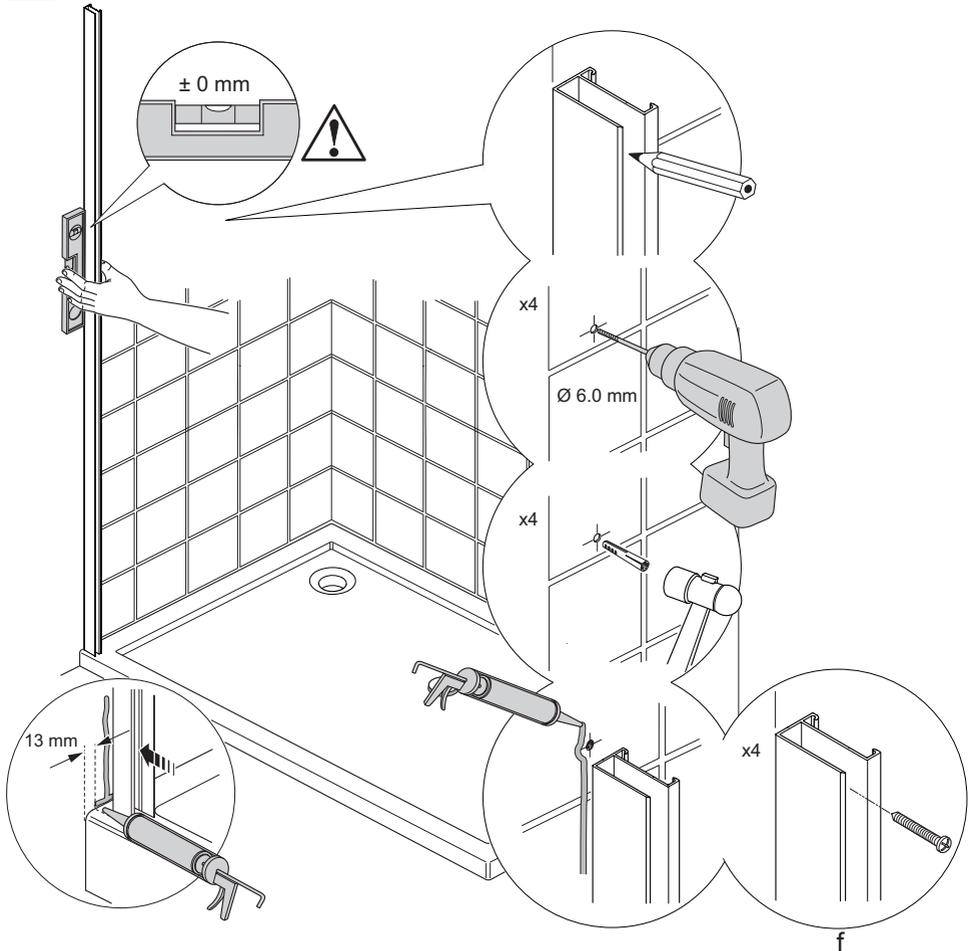

- (a) Install the shower tray in accordance with the manufacturer's instructions.
Caution! Make sure that the shower tray is level and that the walls are vertical and square.

Note! Cover the tray waste to prevent the loss of small parts.

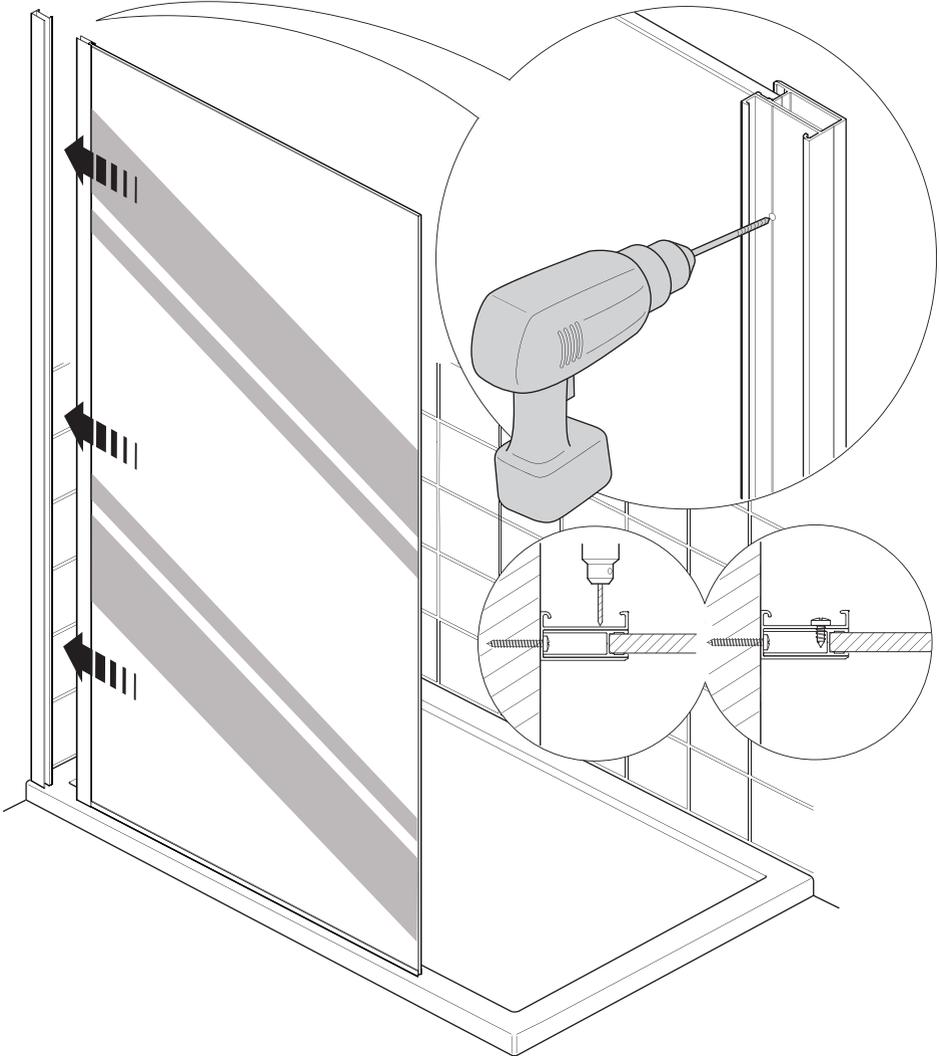

Note! Protect the tray surface during enclosure installation.

2

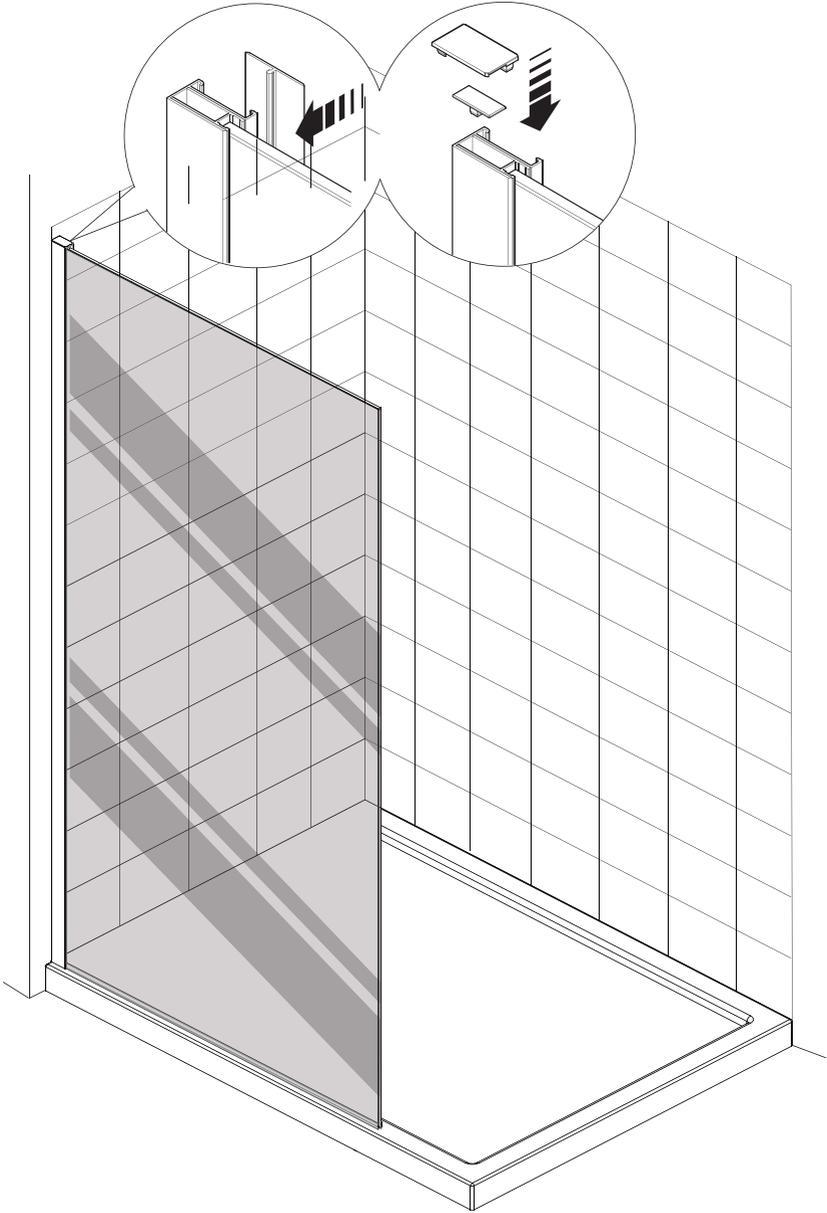

- (a) Position the wall channel on the wall. Using a spirit level make sure that they are upright.
- (b) Mark the position of the fixing holes, then remove the wall channel.
- (c) Drill with a 6 mm masonry bit (not supplied) and plug using the wall plugs (supplied). For other types of wall structure alternative fixings may be required (not supplied).
- (d) Apply silicone sealant along the length of the wall and at the bottom where the wall channel will be placed, including the top of the tray.
- (e) Position the wall channel on the wall and install the fixing screws.
- (f) Fully tighten the fixing screws, making sure that the wall channel is upright.

3

- (a) Install the glass panel into the wall channel that has been secured to the wall earlier.
- Note!** Make sure that the metal strip is at the bottom of the panel.
- (b) Adjust the glass panel so that it is in the correct position.
- (c) Drill four 3 mm holes from inside the shower enclosure in the door frame through the hole centre marked on the wall channel with a 3 mm HSS drill (not supplied).
- (d) Install the screws and tighten.

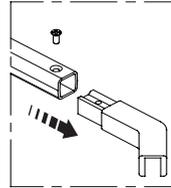

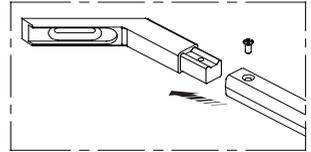

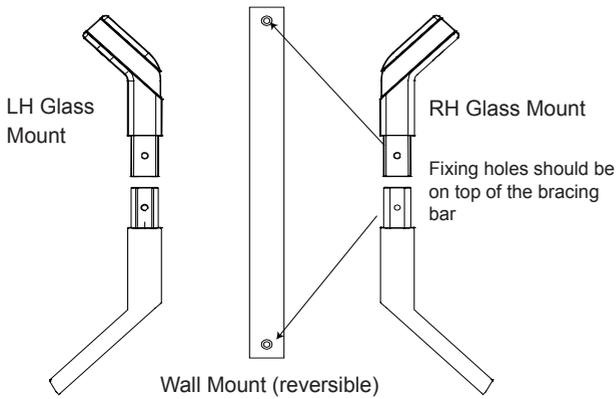

4

Install the wall channel cover and the plastic covers.

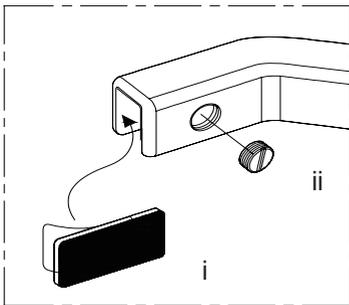

Note! For panels 800, 900, 1000, installation sequence follows from step 5 to step 8; for panel 1200, installation sequence follows from step 9 to step 12.

5

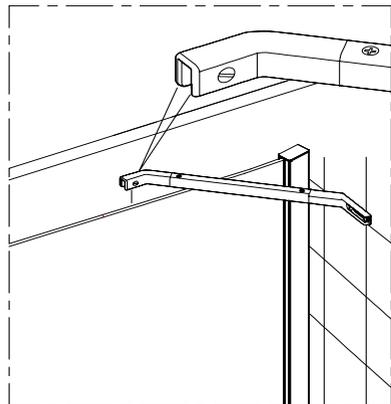

Assemble the bracing bar with the correct parts of a LH or RH enclosure

Insert the glass mount and the wall mount into the bracing bar then fit the screws

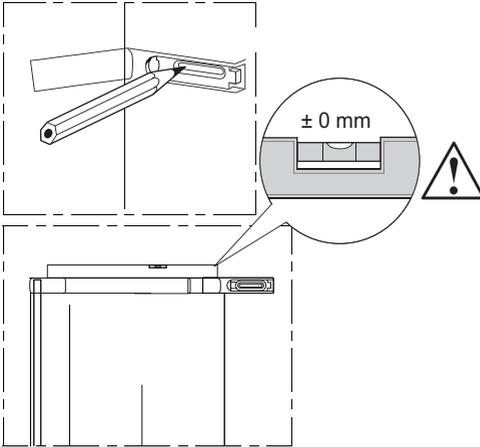

Peel the liner of the rubber pad and stick the pad to the inside of the glass mount. (Opposite side from the locking screw)

Fit the locking screw to the glass mount

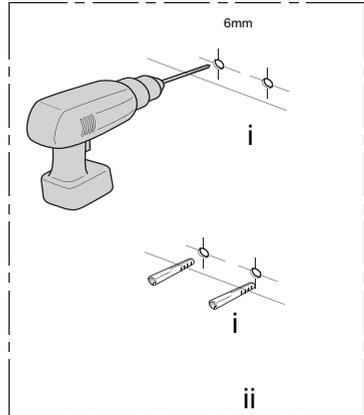

Make sure that the panel is parallel to the front of the glass. Place the bracing bar on the top of the glass

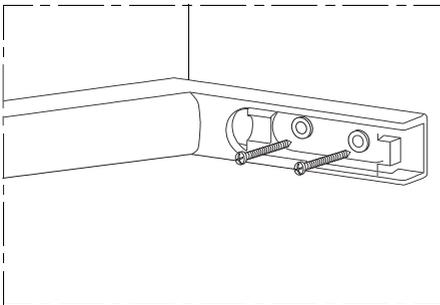

6

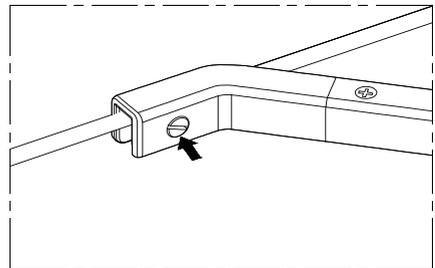

Make the bracing bar horizontal and mark the position of fixing hole on the wall.

Remove the bracing bar and drill the 2x holes in the wall. Install the 2x wall plugs

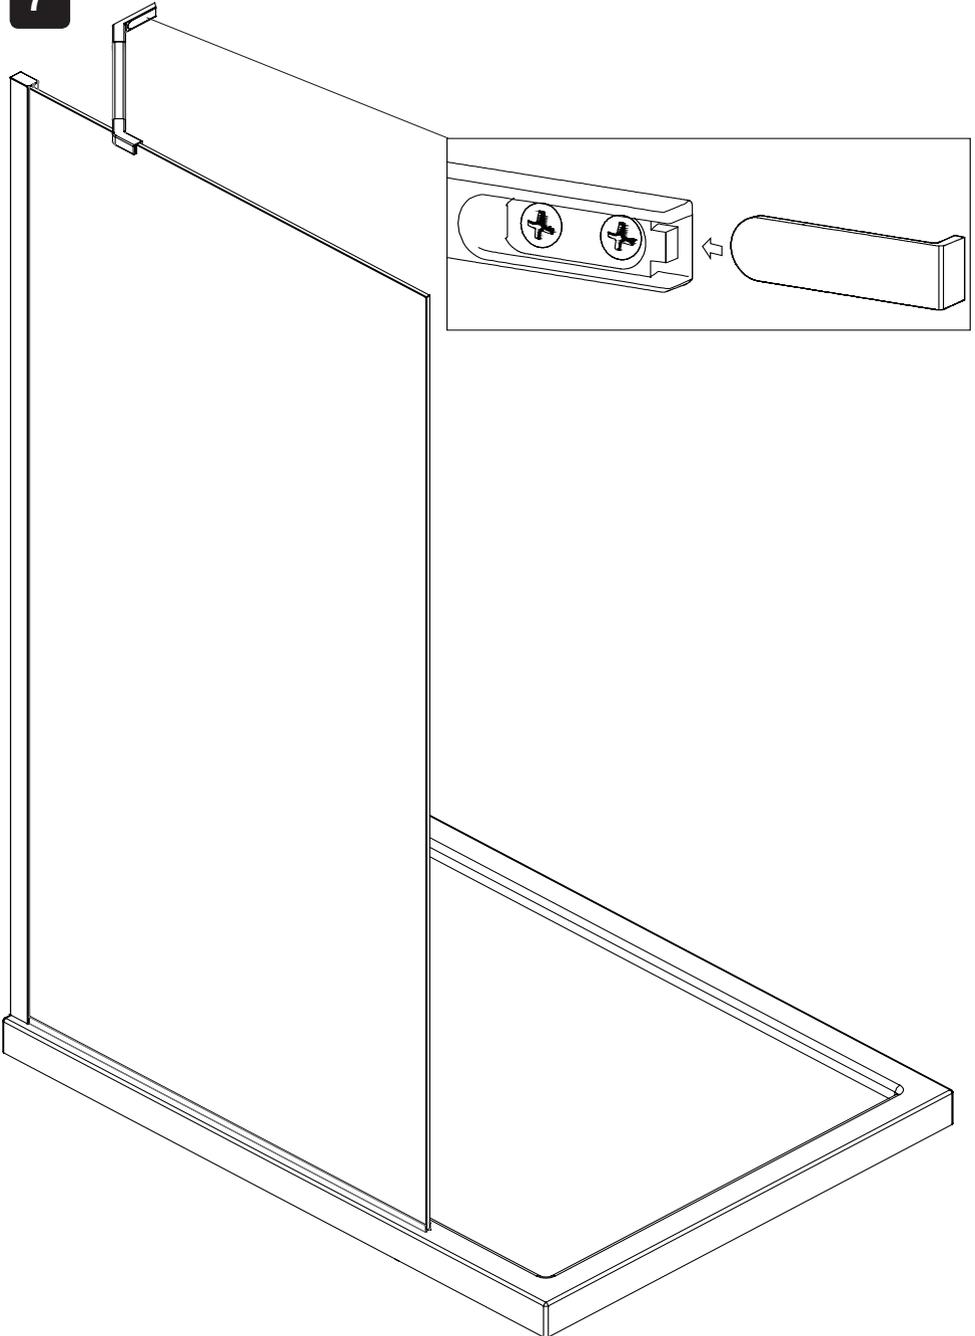

Install the bracing bar back on the glass and install the screws. Make sure that the glass is parallel to the front of the tray, then fully tighten the screws

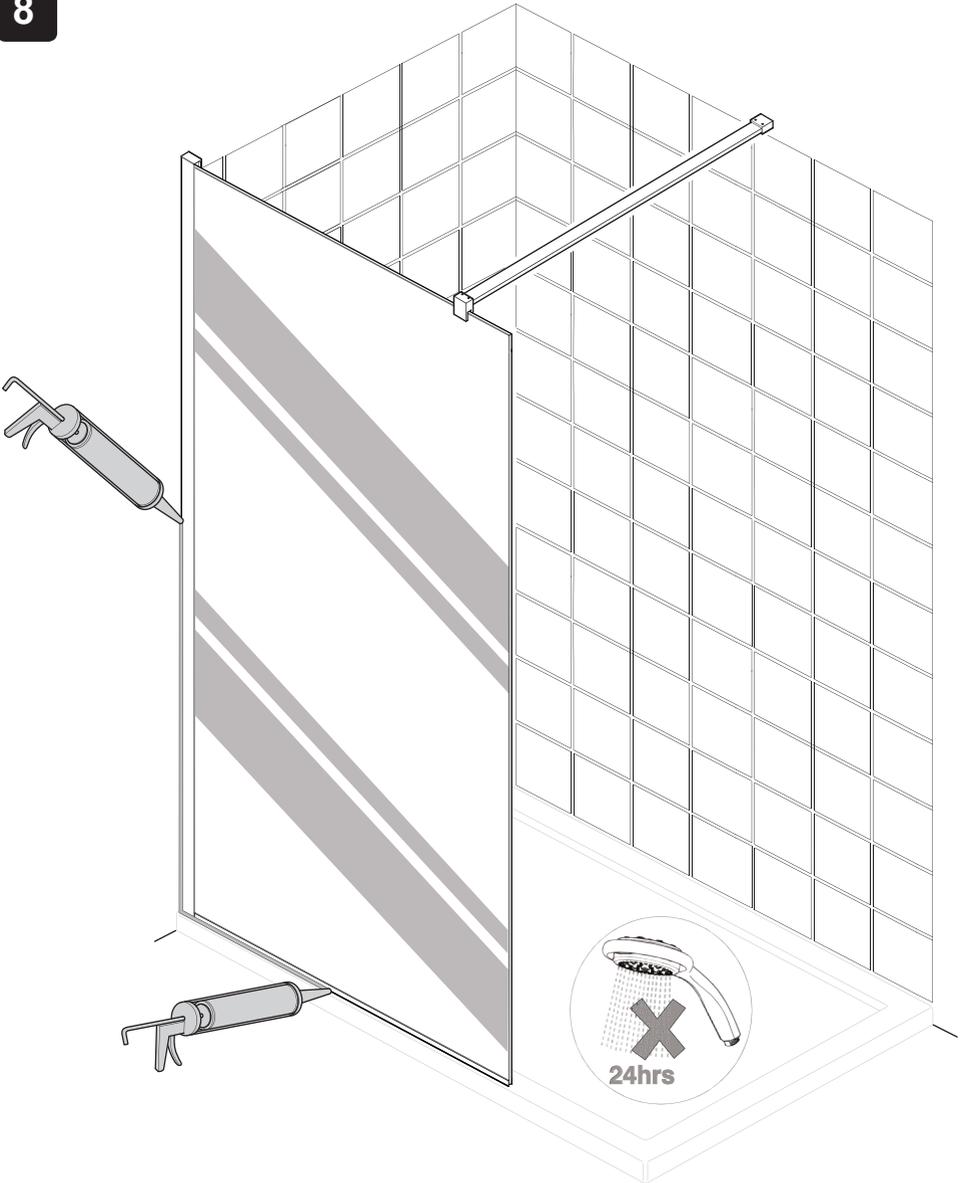

Secure the bracing bar to the glass by tightening the locking screw

7

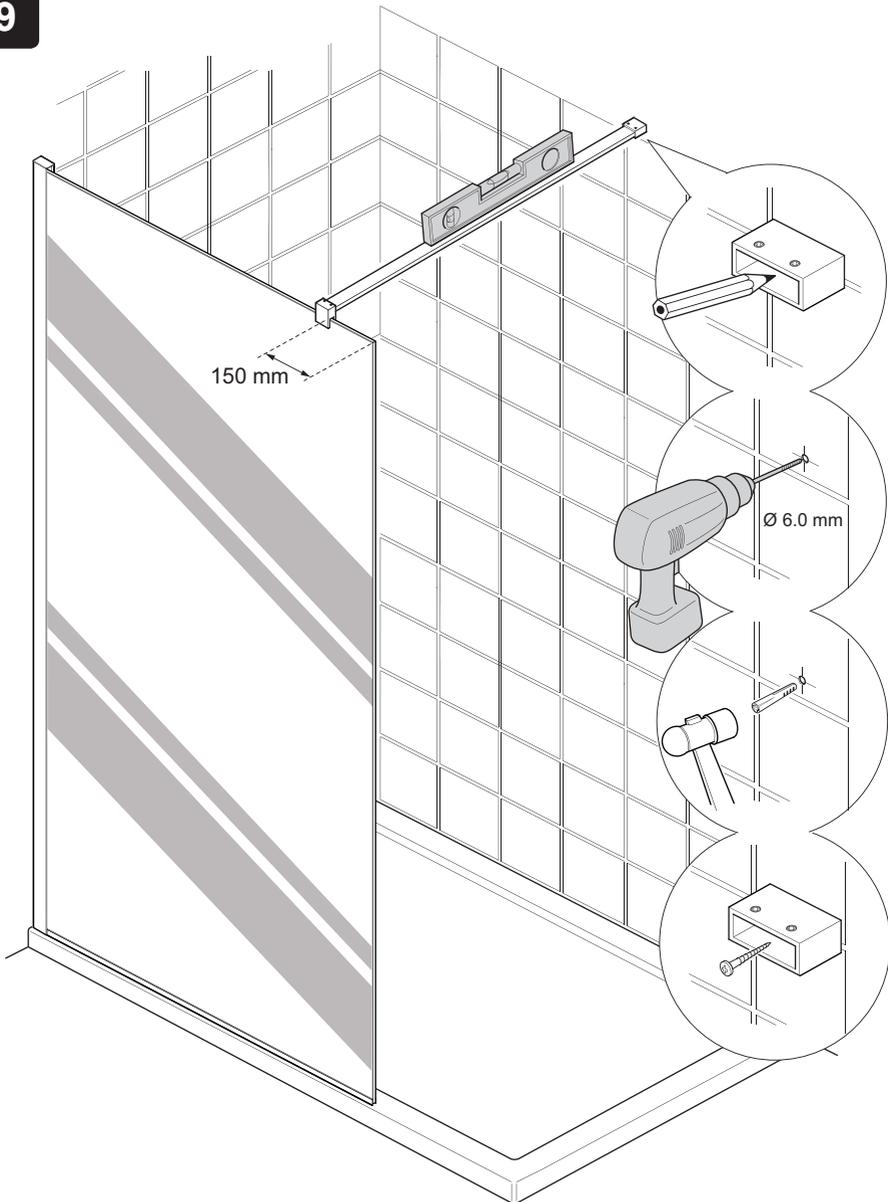

Slide the cover onto the end of the bracing bar until it locks in place.

8

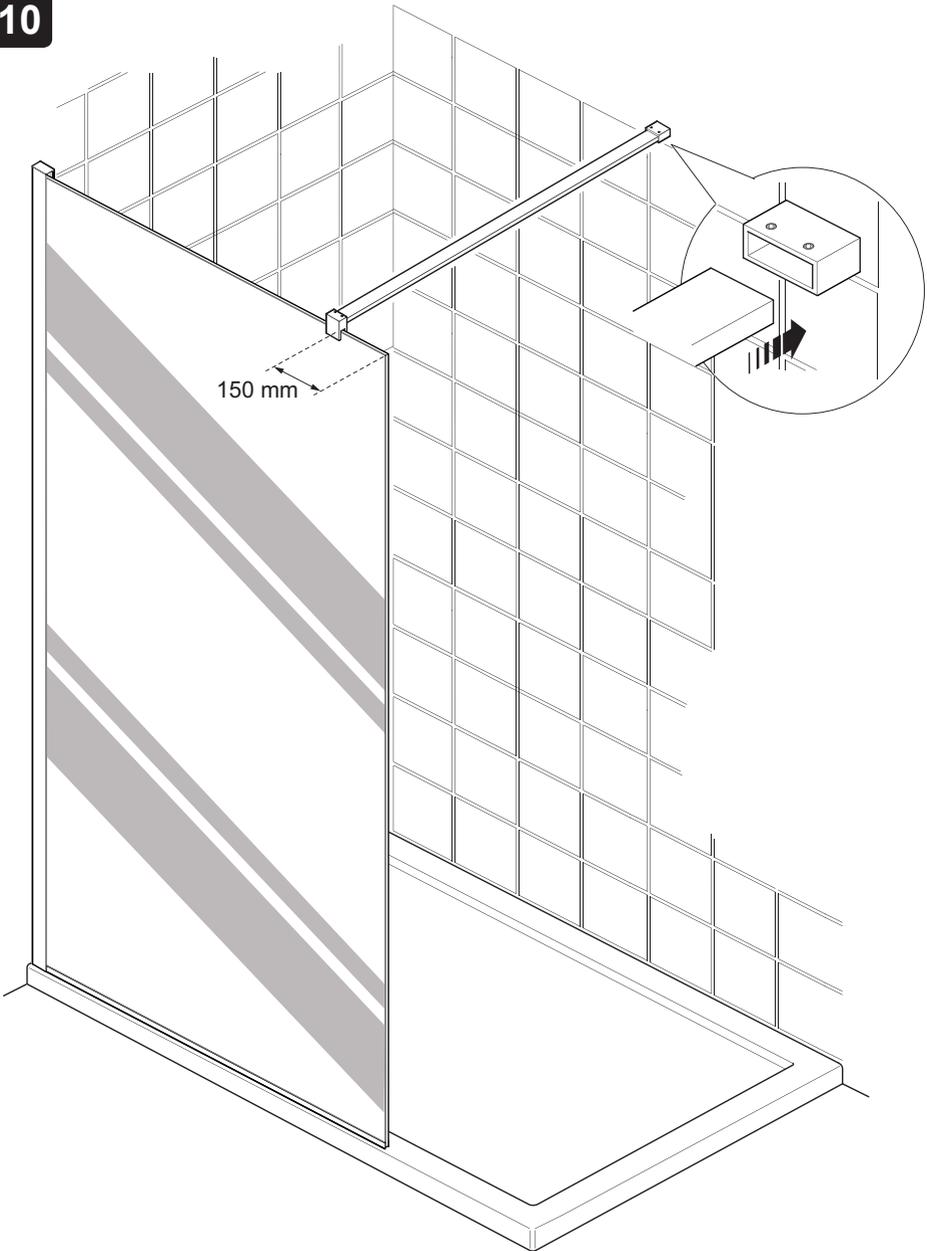

- (a) Apply sealant in accordance with the sealant manufacturers instructions along the outside surfaces of the frame only.
- (b) Allow the silicone sealant to cure for 24 hours before use.

9

- (a) Place the bracing bar in position and mark the position of the wall bracket.
- (b) Mark the position of the fixing holes, then remove the wall bracket.
- (c) Drill with a 6.0 mm drill bit (not supplied) and plug using the wall plugs (supplied).
- (d) Install the wall bracket and secure with the fixing screw.

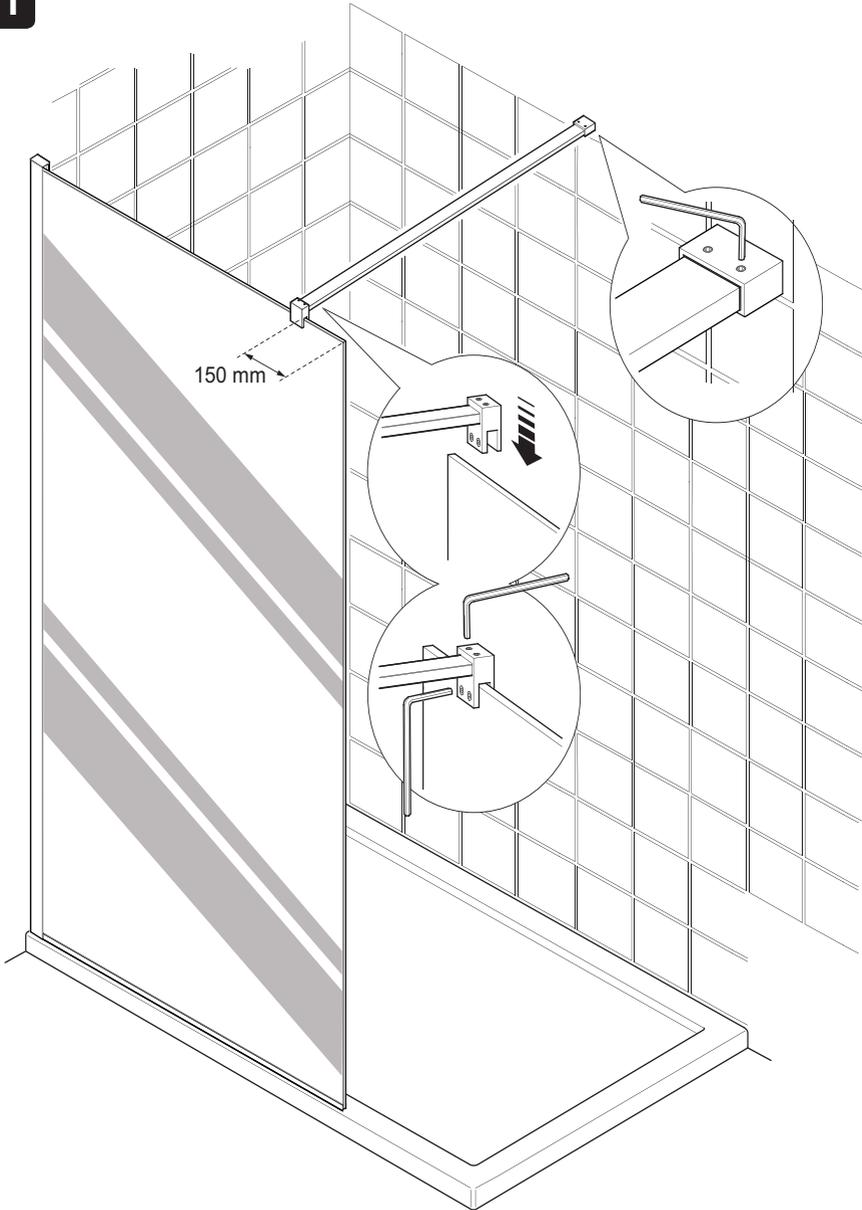

10

(a) Insert the bracing bar into the wall bracket.

Note! The bracing bar may need cutting to length depending on the size of the shower tray

11

- (a) Fit the glass clamp over the end of the bracing bar.
- (b) Fit the glass clamp over the glass panel.
- Caution! Do not overtighten**
- (c) Tighten all grub screws to secure the bracing bar in position.

MAINTENANCE

General Maintenance

Providing the shower enclosure has been correctly installed and is operated in accordance with the instructions contained in this guide, difficulties should not arise.

If any maintenance is required then it must be carried out by a competent tradesperson to whom the maintenance instructions are provided.

Before replacing any parts ensure the underlying cause of the malfunction has been resolved.

Cleaning

Warning! The use of grout/tile cleaners, scale removers, abrasive scourers, drain unblockers and other powerful detergents may lead to damage of metallic, plated and plastic surfaces, including the tray and shower waste.

The enclosure should be cleaned with a mild washing up detergent and wiped dry using a soft cloth.

Care

To preserve the beauty of your shower enclosure for many years, please observe the following care instructions:

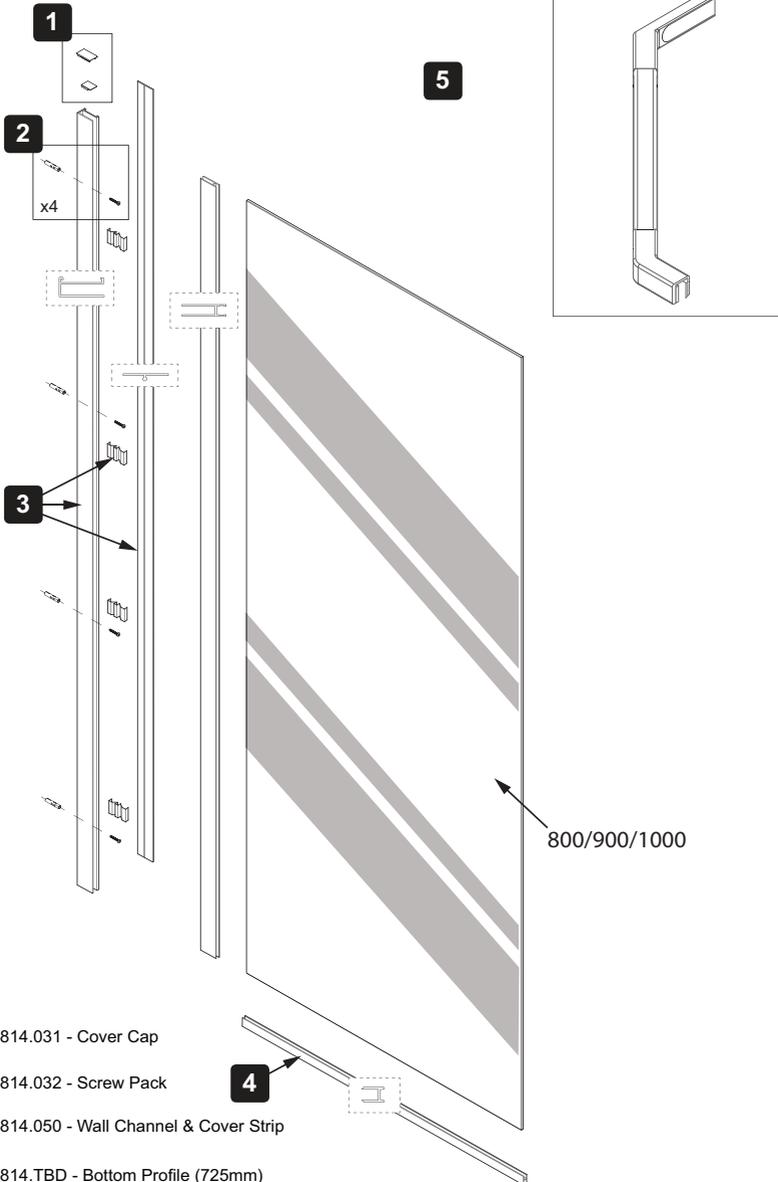

Rinse glass and frame with clear water after showering. Remove water droplets with a squeegee. Do not rub dry! To clean your shower hygienically and easily, we recommend the use of a biodegradable cleanser.

Regular cleansing with a biodegradable cleanser prevents stubborn stains and ensures a clean and hygienic surface for many years. Do not use scouring or caustic cleansers under any circumstances! These can damage the surface of the frame, glass and decorative parts as well as the plastic parts.

Chrome Parts

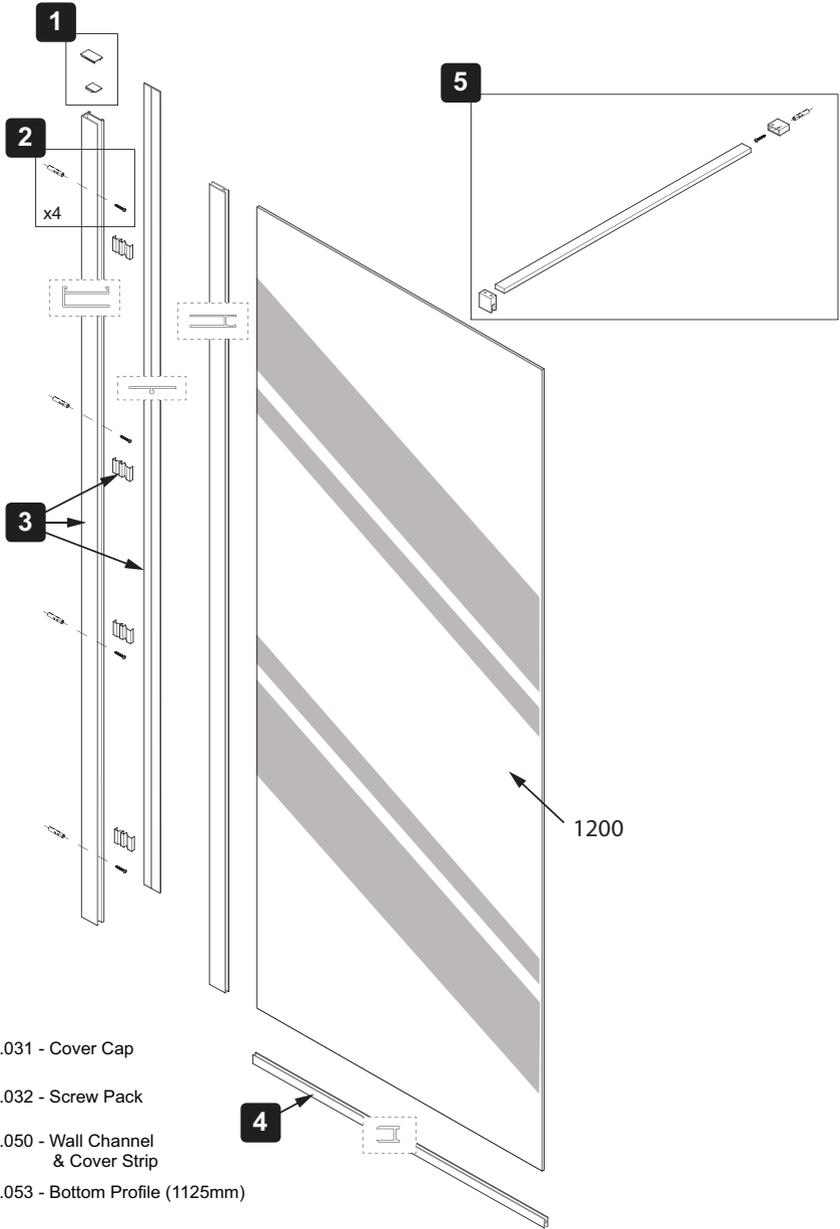

Use only cleansers expressly specified for chrome!
