

Installation Manual

Please keep these instructions for future reference.

WARNING

CAUTION

1. Follow installation instructions carefully to ensure unit is properly attached to the wall.
2. To avoid a possible fire hazard, it is essential unit is mounted in accordance with guidelines stated in the instruction.
3. Radiator is intended for indoor use only, do not place radiator inside a shower, steam room, or wherever unit would be exposed to water.

IMPORTANT CHILD SAFETY NOTE

Important: Please note that you are 100% legally responsible for your own child's safety at home. Once the radiator is installed, it can become a hazard for children as a) This radiator is not designed to support unreasonable extra weight, such as that of a child, and b) The radiator becomes hot during use. Due to this, we must stress that you should not allow children to climb/grab/play with the radiator or rails, as this can cause accident or injury for the child, from heat, falling, or the radiator being pulled off the wall.

TOOLS YOU MIGHT NEED

Adjustable Wrench

Screwdriver

Electric Drill

Pencil

Spirit Level

Rubber Hammer

Tape Measure

Clean cloth

Glove

TECHNICAL DATA

It should only be filled with water, and at a temperature below 100°C (212°F). See table below for installation requirements. If the temperature exceeds 48°C (or 120°F), please install a warning sign near the product to avoid burning and scolding accidents.

Temperature: $0^{\circ}\text{C} < t \leq 100^{\circ}\text{C}$

Comments: If ambient temperature drops below 1°C,
drain out the water to prevent freezing.

Important

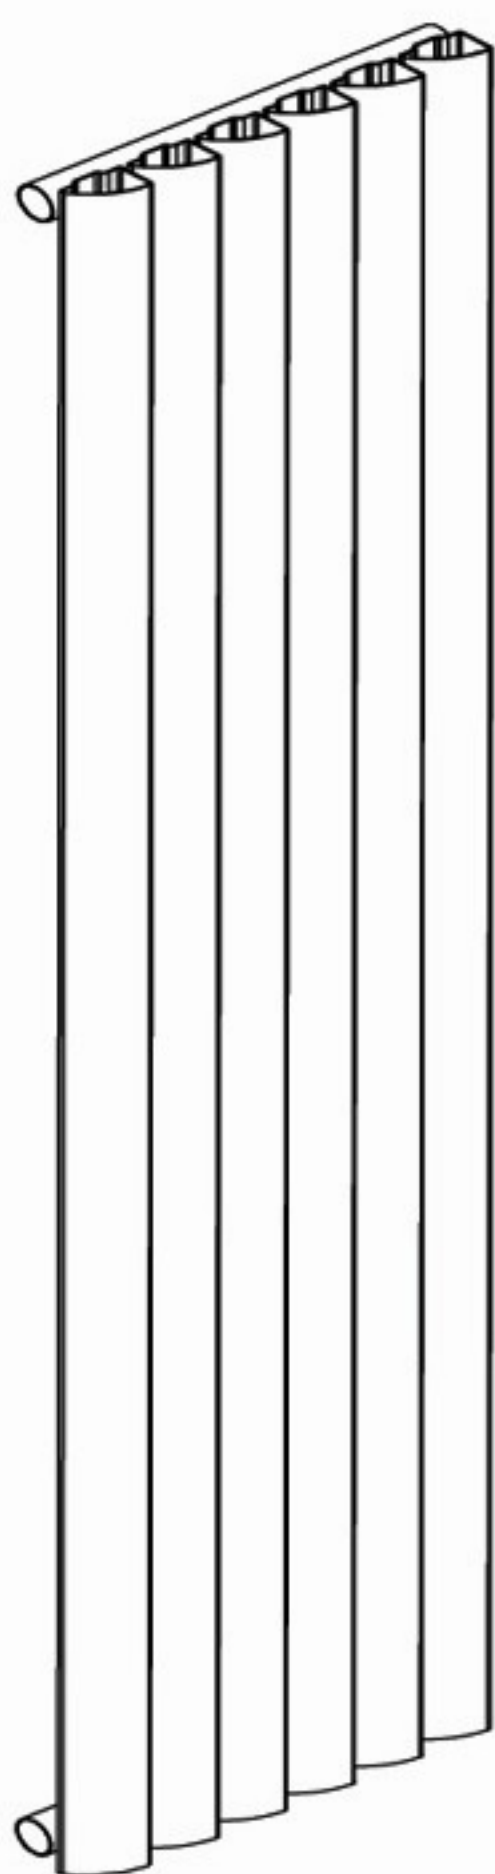

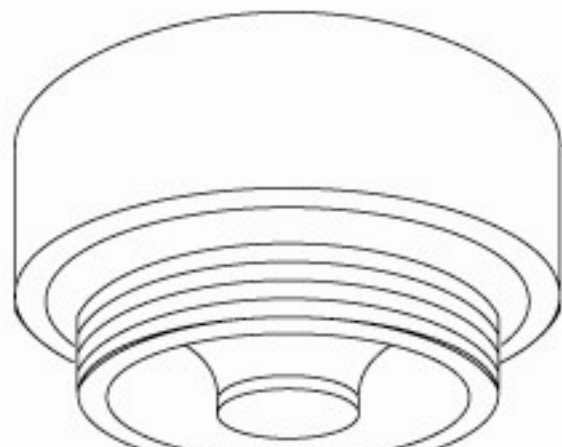

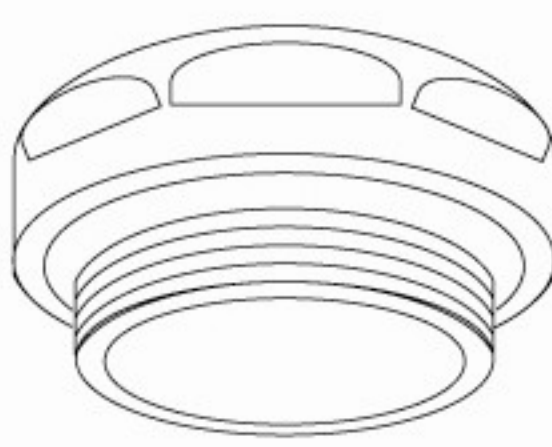

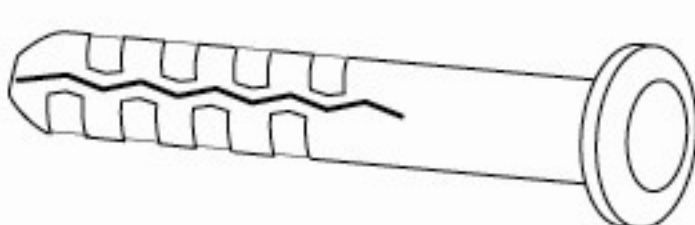

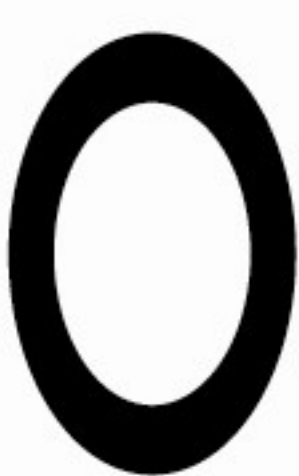

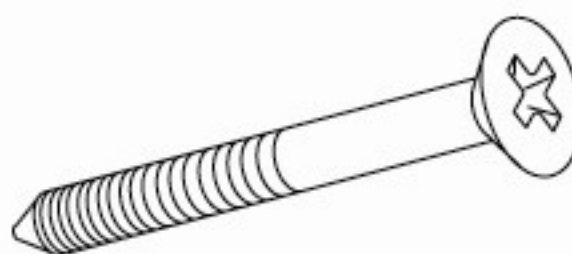

Wipe the surface clean with a soft, damp cloth. Never use abrasive cleaners on this product as they will damage the surface.

BEFORE INSTALLATION

- ✦ Observe all local plumbing and building codes.
- ✦ Shut off the main water supply.
- ✦ Read these instructions carefully to ensure proper installation.
- ✦ Check to make sure you have the following parts indicated below.

Please check you have all of these items in the box.

 Wall Support X4	 Bracket Body X4	 Long Screw X4	 Short Screw X4
 Body X1	 Airvent X1	 Blanking plug X1	
	 Wall plug X4	 Washer X2	 Long Screw X4

INSTALLATION PROCEDURE

1

Assemble the 4 long screws & bracket bodies to towel radiator as below image.

Important Remark (If you want to install the radiator horizontally):

**Specially designed
flow block**

**After removing the
centre block piece**

**Using a hammer & steel rod to remove the centre
block piece**

This radiator is welded with specially designed flow block to increase heating performance, when mounted vertically. If you want to install the radiator horizontally, make sure to remove the centre block piece by using a hammer & 10mm steel rod.

INSTALLATION PROCEDURE

2

Position the towel rail in desired location. Check for level and mark four equal positions for the brackets.

Make sure the towel rail is installed vertically.

Before installation place a dust sheet on the floor to prevent losing any small parts.

INSTALLATION PROCEDURE

3

Drill holes in wall and insert wall plugs.
N.B For false or studed walls different fixings can
be purchased from your local DIY store.

4

Fix all the wall supports to the wall as below image
by using a screw driver

INSTALLATION PROCEDURE

Valve

5

Wrap PTFE tape around the thread of the valve, and install the valve to the bottom of the radiator

INSTALLATION PROCEDURE

6

Slide the brackets into the wall supports and tighten all the screws when in the desired location.
