

AFTERCARE INSTRUCTIONS

Your fitting has a high quality finish and should be treated with care to preserve the visible surfaces.

All surface finishes will wear if not cleaned correctly, the only safe way to clean your mixer is to wipe with a soft damp cloth. Stains can be removed using washing up liquid. All bath cleaning powders and liquids will damage the surface of your fitting, even the non-scratch cleaners. **NOTE: Never use abrasive detergents or disinfectants or those containing alcohol, hydrochloric acid or phosphoric acid.**

Bristan recommend E-Cloth for cleaning all of our bathroom & kitchen products. Using just water, E-cloth gives a smear free, deep clean by breaking up and holding dirt, which normal cloths leave behind. Order through your Bristan stockist. (ORDER CODE: ECLOTH)

GUARANTEE

All products are manufactured to the highest standards and a 5 year guarantee covers any defect in manufacture.

NOTE: The 5-year guarantee on the cartridge is invalidated if damaged by any waterborne debris.

All products must have access for servicing or replacement during the life of the product.

In the interests of continuous product development we reserve the right to alter specification as necessary

Prism 2 Handle Basin Mixer

Fitting Instructions & Contents List

Please keep these instructions for future reference and request of replacement part

WATER PRESSURE

This mixer is suitable for use at all supply pressures. However for optimum use both the hot and cold supplies should be reasonably balanced.

If the fitting is installed at low pressure (tank fed), then the minimum distance from the outlet to the underside of the cold tank should be 5 metres to ensure adequate performance.

Operating Pressures: Min 0.5 bar, Max 7.0 bar.

This mixer should be installed in compliance with the Water Regulations. Where the supplies are unbalanced, i.e. hot water from cylinder tank / cold from the mains, approved check valves must be fitted in the supply pipes.
For further details contact your Local Water Authority.

INSTALLATION

1. Identify all components and check for completeness, particularly before arranging installation.
2. Attach the spout (6) to the body (5), if necessary, ensuring all O' rings are in place.
3. Fit the mixer body (5) to the basin, with the plinth (7) and full washer from the fixing kit (8) above the basin and the rest of the fixing below the basin.
4. Fit the tail pipes (9) by **HAND ONLY (DO NOT OVERTIGHTEN)** into base of the mixer and connect the hot and cold supplies.
5. Fully open both valves, letting it run for a few minutes to check all joints and connections for leaks.
6. See over the page for aftercare instructions.

MAINTENANCE

If the fitting begins to drip:

1. Turn off the water supply
2. Remove handle lever (1) and unscrew grub screw (2). Then remove the rest of the handle (1) by pulling from the plastic spline adaptor (3), if necessary, to aid the removal of the valve (4) from the body (5).
3. Once removed, carefully clean seating, rubber washer & ceramic disc.
4. Replace all of the above then turn on the water supplies.
5. If problem persists, contact our helpline.
