# 1 x LED UNDER BED BATTERY LIGHT

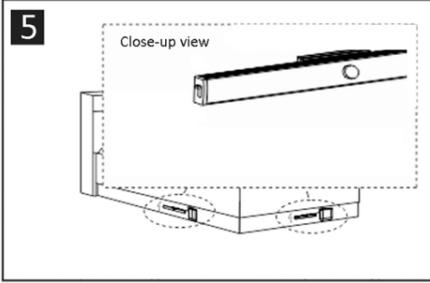

**Installation**

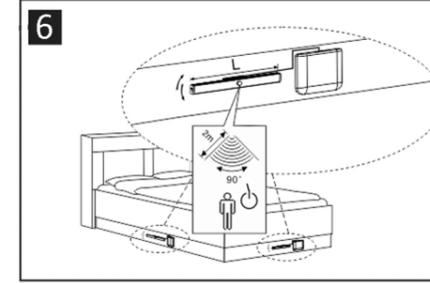

- 

Turn the light so that the screw holes are accessible, as shown above. The light can be turned to a desired position after installation.
- 

Using the screws provided mount the light to the desired position under the bed, as shown above.
- 

Then, using screws, fix the mounting bracket for the battery pack to the bed, near enough to the light so that the cable can reach.
- 

The flat edge of the mounting bracket should lie flush with the surface. Fix the battery pack to the mounting bracket by sliding forward and down, you should hear a click when secure.
- 

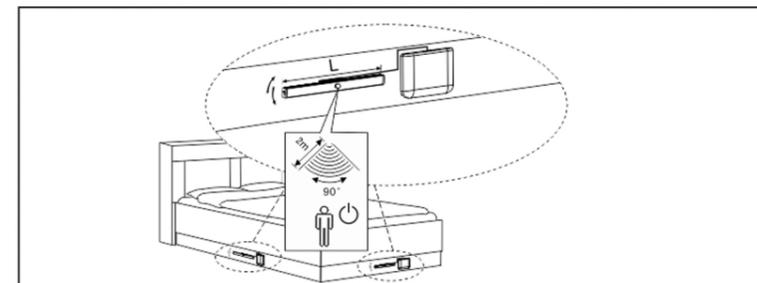

Use the switch located on the side of the LED to turn off/on the LED and sensor when desired.
- 

Tilt the under bed light to your desired position and so that movement can be picked up by the sensor.

- 

To recharge the battery remove the battery pack from the mounting bracket by gently pushing up and then pulling towards yourself. Then connect the USB cable to the charger and light. The indicator light will be red whilst charging. When finished charging the light will turn green. Charging time: 4hours, continuous working time: 7.5 hours.

**Operation**

The LED under bed light has a built-in PIR sensor. This sensor will detect motion from a distance of 2m and the light will switch on. Recharge the battery pack unit using the SE2007000 pluggable USB charger.

**Maintenance & Care**

- Ensure that the power is disconnected prior to cleaning.
- To keep the finish of this product, wipe over with soft cloth periodically.
- Do not use harsh chemical solvents, this may dis-colour or damage the finish.
