

## **Cleaning and Maintenance of Stone Basin**

We recommend that you regularly clean your natural stone sink with a mild dish detergent or stone cleaner. After each use, wipe the basin dry with a soft cloth. Do not allow mineral deposits such as iron, salt, lime, or soap to build up on your sink. Refrain from using acidic household cleaners, wipes with harsh chemicals, or abrasives, as these will damage stone. Seal the stone with a quality sealer, such as StoneTech, to prevent staining and discoloration.
