Stainless Steel Kitchen Mixer

INSTALLATION INSTRUCTIONS

V1.08.23

Please follow these care instructions to ensure your product retains it's high quality finish and please retain this leaflet for future reference.

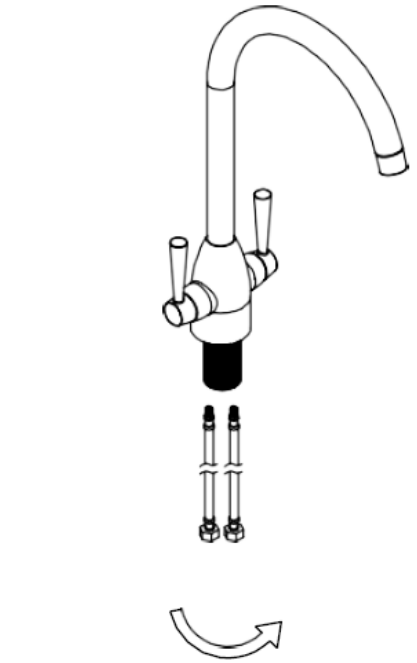

Important Notice

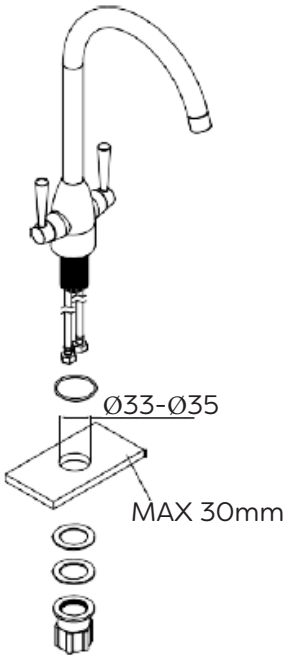

- Please flush out new pipe work prior to connecting the new mixer
- All mixers should be installed with isolating stop valves

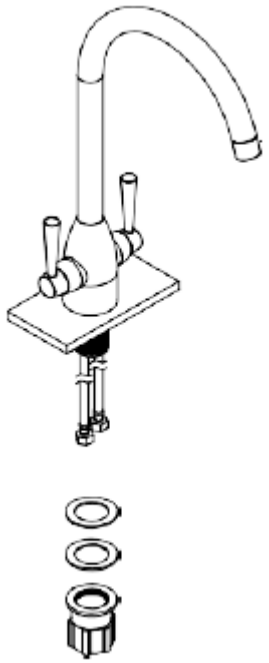

Installation

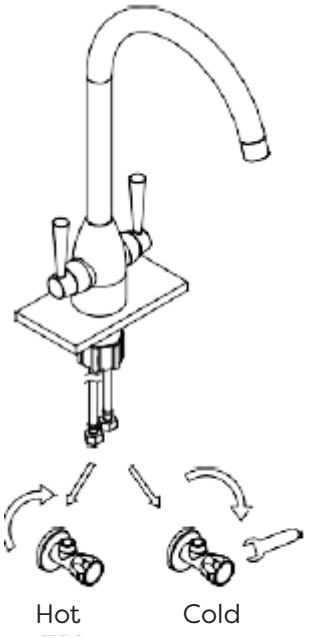

1. Drill a hole 33mm - 35mm in the surface that you would like the tap to be mounted
2. Screw the two flexible hoses into the base of the tap
3. Place the tap unit in the pre-drilled hole in the sink or basin with the flexible hoses going first
4. From the underneath of the basin attach the rubber seal, fixing plate and screw on the fixing nut. Ensure that the tap is firmly attached.
5. Connect the mixer to the water supply by connecting the two flexible hoses to the isolating stop valves
6. Check all water feed connections to ensure there are no leaks.

Diagrams are for illustration purposes only. Your tap may superficially differ from this drawing, however the installation guide steps still apply.

WARNING!

We recommend that this product is installed by a qualified tradesperson and we accept no liability for products fitted incorrectly, and where the correct testing procedures have not been used, resulting in the escape of water.
