## Installation Instructions & User Guide

Please leave these instructions with the end user

Product Code: AX PROSNK C (D2)

### **Specifications**

#### **Dynamic Water Pressure**

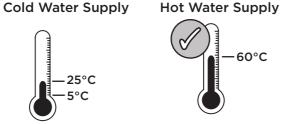

Min: 5°C Max: 25°C

#### **Inlet Water Temperature**

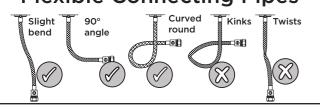

#### **Inlet Connections**

Flexible

Maximum Static Pressure: 10.0 bar Flexible Connecting Pipes

## **Tools You'll Need**

Adjustable Spanner

## **Prior to Installation**

All products manufactured and supplied by Bristan are safe to use provided that they are installed, operated and receive regular maintenance in accordance with these instructions.

This product needs to be installed in accordance with, and meet the requirements of the Water Supply (Water Fittings) Regulations 1999 and current by-laws. For full Installation Requirements & Notes (IRN) please visit wras.co.uk/directory.

Isolation valves must be fitted to the inlet water supplies to ensure ease of future maintenance.

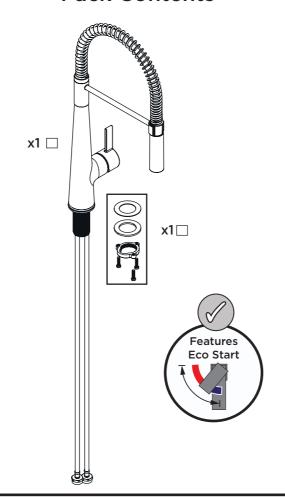

Before installing this product the water supply must be thoroughly flushed in order to remove any swarf, solder etc. Full access must be made available for future maintenance/ servicing purposes.

This product must not be modified in any way as this will invalidate the guarantee.

If in doubt, contact a registered plumber, your Local Water Authority or the Secretary of the Institute of Plumbing, address as follows:-

The Institute of Plumbing, 64 Station Lane, Hornchurch, RM12 6NB, Tel: 01708 472791

## Warning from Your Water Supplier

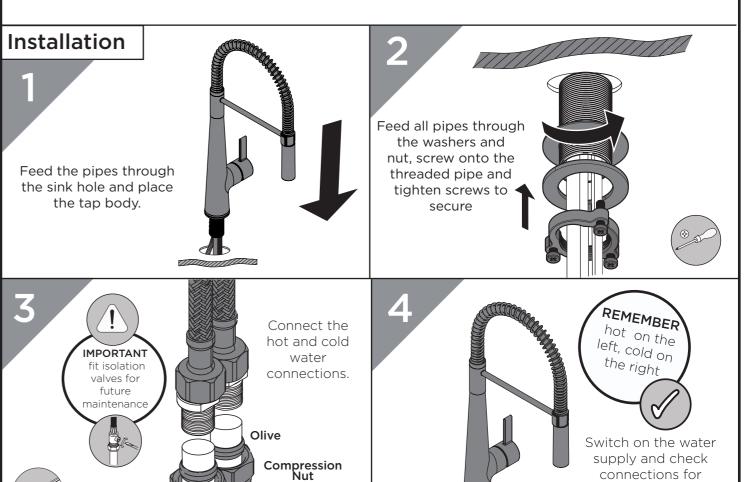

It could be a criminal offence to use this tap with a mains water supply drawn directly from the supply pipe (the supply pipe is the one that brings the water supply into your home and is directly connected to the public water main).

This tap has an outlet on a flexible hose, which if immersed in water, could result in contaminated water being back drawn into the pipework if the supply pressure dropped. To prevent contamination of drinking water in the premises and in the water main, and to comply with the legal requirement of the UK plumbing regulations and byelaws, both hot and cold water supplies to this tap must come from a storage cistern.

If the distributing pipes feeding this tap from the storage cistern have other outlets connected to them, the outlet of this tap must be lower than any of those other outlets.

If installed as a tap which is used for drawing water for drinking, and the quality of the water from the storage cistern does not meet the standards for drinking water, a separate tap supplied with wholesome water must be provided for drinking

For further information, contact the Water Regulations Department of your Local Water Supplier (see WRAS website: wras.co.uk) or contact the Water Regulations Advisory Scheme by email (info@wras.co.uk) or telephone: 0333 207 9030

## **Spare Parts**

To replace any spare parts for your tap, why not scan the QR Code or visit www.bristan.com and search for your product.

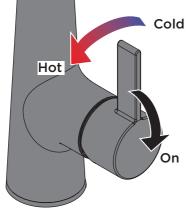

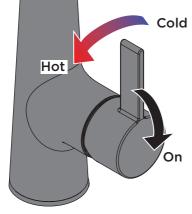

any leaks.

## Operation

For cold water, position the handle straight upwards. To increase the temperature, turn the handle to the left.

The temperature will gradually rise the further the rotation of the handle.

Bristan products are made from premium materials, with hand polished. PVD, EPD or electroplated finishes.

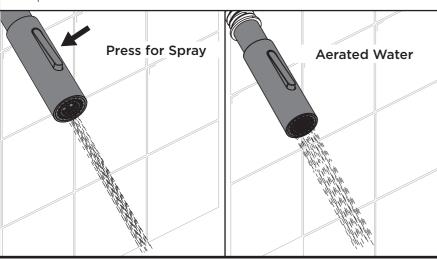

**General Cleaning** 

Your tap should be regularly cleaned with warm water, a mild pH-neutral liquid soap, and polished with a soft cloth. Any residues from soap, toothpaste, shampoos and shower gels can cause blemishes if not rinsed off straight after use.

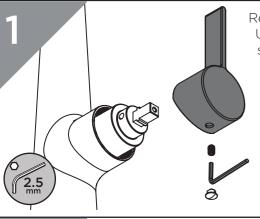

Household bleaches and cleaners contain harsh chemicals and may damage the surface finish. Avoid using abrasive cloths, scouring pads, scrub sponges, steel wool or anything similar.

Some surfaces such as nickel and pewter may be affected by the dye found in some cloths, so it is also important to avoid hanging cloths on spouts.

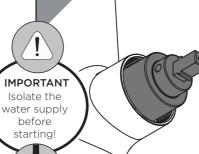

The handle will cease to turn once it is at a 90° angle. supplying the maximum temperature.
