

# Shower Handset - Eco

Part of a range of stylish, high performance shower handsets from Croydex. Ideal for replacement or upgrade of existing accessories. Compatible with all standard ½" B.S.P. threaded fittings.

## General Safety Advice

For safety and convenience do not use with water above 65°C or with excessively high water pressure (max 50psi/3.5 bar).

To avoid the risk of scalding you should always check the water temperature before entering the shower.

Always take care when using hot water, especially with children and NEVER leave a child unattended in the bathroom.

Electric Showers (Check suitability before installation.)

Subject to 0.5 Bar minimum operating pressure.

## ECO Water Saving Feature

The shower handset is designed to optimise water efficiency without adversely affecting the performance and sensation of the shower, however for enhanced water efficiency they also include a flow regulator to limit water consumption to a nominal 8 litres per minute regardless of water pressure.

Simply insert the flow regulator supplied into the shower handset during installation.

The flow regulator can be removed at any time if required. (See images below for details.)

**\* Do not use the flow regulator with electric showers.**

## Easy to Clean

Our shower handsets feature rub clean nozzles which are easy to unblock, helping to keep limescale build-up to a minimum.

To clean, simply rub the surface of the shower handset gently in a clockwise direction with your thumb to break away any hard water deposits which could affect the shower's performance.

## Easy to Install

### Shower Handsets

1. Unscrew your existing shower handset from the shower hose and discard along with your old washer.
2. Clean the threads on the shower hose.
3. Position the washer supplied in the connector of your shower hose and attach it to your shower handset. Do not over-tighten.
