

This product is IP44 - suitable for installation in zones: 2 & Outside Zone

All installations must comply with guidelines which are based on a zonal concept. The diagram above illustrates this concept and must be followed to ensure the safe installation of electrical appliances in the bathroom. These regulations apply to domestic installations only. Installations must be made in accordance with the current IEE wiring regulations and relevant building regulations. **HiB recommends that all electrical bathroom products should only be fitted by a suitably qualified, Part P registered electrician.**

Installation

1. Position the mirror in a suitable location (according to the zonal diagram above (Fig. 1), ensuring that the domestic electrical mains supply is within reach of the electrical entry point of the product.
2. Carefully mark the position of the mirror using a soft pencil.
3. Remove the mirror and mark the mounting points according to the diagram on the right (Fig. 2). These mirrors can be hung portrait or landscape - only mark the positions of the appropriate mounting points. **Please ensure that all marked mounting points accurately match up with the fixing points on the mirror.**
4. **Before drilling, ensure there are no hidden cables or pipes behind the mounting points.** Using a masonry drill, drill holes in the marked positions to a suitable depth. If drilling through tile, use a ceramic drill bit.
5. Insert wall plugs level with the surface of the wall. If fitting to a tiled surface, wall plugs should be inserted below the tile surface to avoid cracking. *NB. For plasterboard walls, specialist fixings should be purchased, available from any DIY or hardware store.*
6. Screw hook screws into wall plugs.
7. **Natalia & Ella Only:** Affix the pullcord component to the back of the mirror in a suitable location and thread the cord through either the landscape or portrait holes on the mirror frame, depending on the mounting orientation.
8. This is a Class II product and does not require an earth connection.

WEEE compliance

Must not be mixed with general household waste.

Natalia Art No. 64154395

Ella Art No. 64154495

Victoria Art No. 64154595

Thank you for purchasing this HiB product.

Please read through these instructions carefully and refer back to them during installation to ensure that your product is fitted safely and that it retains its high quality finish.

Please retain this leaflet for future reference.

Before installation, ensure the domestic electrical mains supply to which the mirror is to be connected is turned off. Before drilling, ensure that there are no hidden cables or pipes in the wall.

Ensure the domestic electrical mains supply to which the mirror is being connected is turned off. Connect the domestic mains supply to the terminal box according to the wiring diagram below (Fig. 3)

9. Hang the mirror in position and ensure domestic electrical supply to which the mirror is connected is switched back on.

Operating Instructions

To turn illumination on or off, operate the pull cord located at the bottom of the mirror, or for the victoria mirror, operate the rocker switch. Heated Pad is only on when mirror is illuminated. LEDs are not replaceable.

Care Instructions

Do not use abrasives or solvents when cleaning this product. Wipe off all water spillages as soon as possible using a soft, damp cloth.

Aftercare Service

In the unlikely event that this product should fail please contact HiB customer services, details shown below.
