

LQ057 INSTALLATION

INSTALLATION GUIDE:

1. Position the hanging point of the mirror and marking the drilling holes; Ensure the two drilling holes on the same level. Drill the holes by using a drill, then plug the wall plugs into the wall and plug the tapping screw into the wall up to 2-3 mm, and then hang the mirror cabinet on the wall .
2. Connect the electric wiring.

NOTE: There should be no any reflective objects (e.g., stainless steel, mirror or tap ect.) within the range of 30cm in front of the induction window.
