

GETTING STARTED

- Ensure that you have gathered all the required materials that are needed for the installation.
- For the following instructions, it is assumed that the vanity and countertop are already in place.

Installation

1. Carefully place your vessel sink upside down on the counter top. Apply a generous amount of silicone sealant to the base of the sink where it will rest on the counter.

2. Turn the sink right-side-up and position over the drain hole. Set the sink in place, and press firmly to secure.

TOOLS AND MATERIALS:

Silicone Sealant
(100% Neutral
Cure)

Damp Cloth

3. If desired, apply a continuous bead of silicone sealant around the perimeter of the sink base for additional stability.

4. Remove any excess sealant with a damp cloth to complete installation.

5. Proceed to the installation of the sink drain. Refer to the drain's installation instructions for guidance.

6. Allow the sealant to fully dry for 24 hours.

Cleaning and Maintenance of Stone Basin

We recommend that you regularly clean your natural stone sink with a mild dish detergent or stone cleaner. After each use, wipe the basin dry with a soft cloth. Do not allow mineral deposits such as iron, salt, lime, or soap to build up on your sink. Refrain from using acidic household cleaners, wipes with harsh chemicals, or abrasives, as these will damage stone. Seal the stone with a quality sealer, such as StoneTech, to prevent staining and discoloration.
