#### GUARANTEE & AFTERCARE

When installing or using tools, extra care must be taken to avoid damaging the finish or fitting. To maintain the appearance, please ensure it is cleaned regularly using a clean soft damp cloth only. Abrasive cleaners or detergents must not be used as they may cause surface deterioration. The company provides a guarantee against faulty material or manufacture excluding serviceable parts, providing they have been installed, cared for and used in accordance with our instructions.

#### WATER SUPPLY REGULATIONS

This product has been manufactured to comply with the appropriate BS EN Standards and to conform to Water Supply Regulations 1999.

#### EARTH BONDING

Earth any new pipe work satisfactorily (Seek expert advice if in doubt). The company reserves the right to continually evolve its product lines without notification. The company will not accept any liability regarding specification changes and their consequences unless previously quoted by the company in writing.

#### INSTALLATION PROCEDURE

1. Prior to installation please ensure all the supply pipes have been flushed through to remove any debris and then ensure the water supply is turned off.
2. We strongly recommend the fitting of service isolation valves to the inlet feeds for ease of future maintenance.
3. The fitting of a back flow prevention device may be necessary if these are not already in the supply lines - please check and install if necessary - these are not supplied with this fitting.
4. Ensure you have all the relevant tools before commencing the installation and take note of any specific markings on the product to make sure they are installed correctly.
5. Carefully assemble the new fitting onto the bath. Do NOT over-tighten as this may cause damage to the fitting and/or bath.
6. Connect the water supplies to the inlet connectors. Please ensure you take note of any specific markings on the product to make sure they are installed correctly.
7. Ensure the control operating this fitting is in the open position and turn on the water supply. Allow the Free Flow to run for a few minutes to flush out any debris.
8. Check all water feed connections to ensure there are no leaks.
9. Check the assembled fit of the product to the bath to ensure there is no water ingress that may cause water damage after installation.
