

Copper Bath

Under no circumstances should you use any abrasive cleaner to care & maintain this product.

Our unique Copper Baths are handcrafted, each one having its own exclusive handmade appearance.

The surface finish of each Bath will have its own individual hallmarks of being handmade, with natural scuffs, imperfections and textures being visible adding to the products unique charm & character.

We recommend Regular Cleaning with warm soapy water and a soft cloth and drying straightaway after each use. This will ensure the Copper Bath maintains its bright, untarnished finish.

To maintain the baths appearance, we advise that you Re-apply a suitable wax seal every Month, depending on use.

Should the wax wear off, the surface of the Copper may tarnish. This Tarnishing is a natural process, and can be removed by using a suitable metal polish such as auto sol. Re-apply the wax seal after this process.

For Baths with a Nickel finish, the wax seal should be re applied regularly. Under no circumstances should any abrasive cleaners be used, such as Metal cleaners as this will damage the Nickel finish.

By following these care & maintenance guidelines, you will enjoy years of trouble- free use from your unique, distinctive Bath.

NB : Do not cut into the Baths plinth as this will invalidate the products guarantee .
